INTRODUCTION

Many word search puzzle books detail the ethereal benefits of the mental exercise involved in solving word or letter puzzles. These books also describe the obvious methodology where the solver finds words (or in this case, words and phrases) side to side; forward/backward; or, diagonally. Crossing off the words or phrases helps the solver detail the success of his task.

Our purpose is to cleverly and effectively detail the more egregious quotations and actions of the current occupant of the White House. This book is unique from the usual seeking of the genus or species of the Etruscan rootworm or the aboriginal scab camel. May this puzzle book help alleviate the boredom of a waiting room or commercial breaks or struggling to listen to the drive-by media propaganda ministry while, at the same time, revealing more of our “historic leader” and his road to socialism.

We understand that a Prague newspaper printed the following: “The danger to America is not Barack Obama, but a citizenry capable of entrusting a man like him with the presidency. It will be far easier to limit and undo the follies of an Obama Presidency than to restore the necessary common sense and good judgment to a depraved electorate willing to have such a man for their President. The problem is much deeper and far more serious than Mr. Obama, who is a mere symptom of what ails America. Blaming the prince of the fools should not blind anyone to the vast confederacy of fools that made him their prince. The republic can survive a Barack Obama, who is, after all, merely a fool. It is less likely to survive a multitude of fools, such as those who made him their President.”

We would like to believe that some of the folks who voted for Obama in 2008 may experience an epiphany through solving our puzzles. If not, well, we still pointed out the tragic errors of his way. Socialism hasn't worked in any country where it's been tried. Obama and his ilk believe that's just because the wrong people were in charge. We think, know, and believe that the United States of America will not fall into grips of this sort of tyranny because our citizens will rally against such a tragedy. This book is just one small way of pointing out the siren's snare.

INSTRUCTIONS

Quotes from Barack Obama's biggest lies and scandals are broken down into single-line search terms. Seek, find and circle each line of text within the jumble letter code box. Words are placed horizontally, vertically and diagonally, both forwards and back-to-front. There are also overlaps between words so you will need a sharp eye to spot all the words and crack the Obama Code!

Saul Alinsky
Rules for Radicals

One: "Power is not only what you have, but what an opponent thinks you have. If your organization is small, hide your numbers in the dark and raise a din that will make everyone think you have many more people than

you do."

Two: "Never go outside the experience of your people. When an action or tactic is outside the experience of the people, the result is confusion, fear and retreat... [and] the collapse of communication."

Three: "Whenever possible, go outside

the expertise of the enemy. Look for ways to increase insecurity, anxiety and uncertainty (This happens all the time. Watch how many organizations under attack are blind-sided by seemingly irrelevant arguments that they are then forced to address.)"

Four: "Make the enemy

live up to its own book of rules. You can kill them with this, for they can no more obey their own rules than the Christian church can live up to Christianity."

Five: "Ridicule
 is man's most
 potent weapon.
 It is almost
 impossible to
 counteract
 ridicule. Also it
 infuriates the
 opposition,
 which then
 reacts to your

advantage."

Six: "A good
 tactic is one
 your people
 enjoy. If your
 people aren't
 having a ball
 doing it,
 there is
 something
 very wrong
 with the tactic."

Seven: "A
 tactic that
 drags on
 too long
 becomes
 a drag. Man

can sustain
 militant
 interest in
 any issue
 for only
 a limited time...."

Eight: "Keep
 the pressure
 on. Use
 different
 tactics and
 actions and
 use all events
 of the period
 for your
 purpose.
 The major
 premise for
 tactics is the

development
 of operations
 that will
 maintain a
 constant
 pressure
 upon the
 opposition.
 It is this that
 will cause
 the opposition
 to react
 to your
 advantage."
